Kristen

You are welcome to participate in the discussion tomorrow, the issue before the closure committee is to review the technical information presented by EPA to determine if the Tower Standard site should be reopened or not or if there is another potential source that should be investigated. The discussion will be from 9:30 until 10 a.m. The call in number is (888) 327-8914 and the pass code is 6751 034#.

**Subject:** Feb 6th DNR closure committee meeting , Sites within LDF reservation

Good Morning Ms. Coakley,

The Tribe has encountered some significant petroleum contamination at depth and adjacent to a

lake (December 2013 sampling summary report attached). Area private wells are screened at similar depths to petroleum contamination. We have received project review and technical assistance from EPA staff. Although the source is not certain, there is considerable evidence that the source is the Tower Standard Service Site (BRRTS #: 0364001172 ) closed in 2006. EPA has been in contact with the northern region. A conference call is scheduled tomorrow with EPA staff Bob Egan and Sherry Kamke and the WDNR Northern Region Closure Committee.

We would like to be included in this call and when sites within reservation boundaries are considered for closure. We appreciate your consideration of our request.
